

Kevin Duffy

Operations Director (National)

I joined LMF in January 2023 as the new National Operations Director, a very exciting opportunity in a role that I knew would challenge my skills, whilst developing my knowledge within the Energy sector.

My professional background stems from 10 years' service in the Royal Air Force, specialising in Aviation Fuels & Lubricants and Logistics. After leaving the Military I joined Certas Energy, the largest fuel & lubricant distributor in the UK, as Operations Manager for England & Wales. I enjoyed 10 exciting years in a fast-paced environment, responsible for 3PL logistics, Distribution & Warehousing, and substantial involvement in the divisional Health & Safety performance.

Since joining LMF, I have been focusing on the operational growth & strategic planning of the business, reviewing internal processes and the business structure to ensure the cost-effective & efficient running of the teams operating on national contracts.

With a keen interest and excellent understanding of Health & Safety in the workplace I have committed a lot of time to ensure LMF as a business continue to operate safely but more importantly grow & develop in an ever-changing environment.

Overseeing the Operational Project Managers, I work closely with them to ensure the thousands of Energy Efficient measures, Private or ECO are installed to the highest standard, whilst maintaining a high level of customer service.

The Development of the Launceston site & southern operations team is starting to take shape and the New Durley Site is thriving, a new warehouse facility supporting installs across the UK and a 25 personnel support team, a new project I was proud to be a part of.

My journey at LMF has only just begun but my time so far has been exciting and rewarding, I look forward to growing with the business for many years to come.
