

## Laura Williams

### Finance Manager

---

I'm the Finance Manager at LMF Energy Services and have worked here for 5 years (and counting!) I'm an AAT Qualified Accountant, currently working towards CGMA status with CIMA.

My role as Finance manager is to take care of the overall financial health of the business. I support the FD with the production of monthly management accounts, implement and maintain robust internal controls and partner with various departments such as Sales, Operations and Commercial to ensure accurate reporting and maximum profitability. All while studying, being a mum (to my own daughter and half of the office) and just trying to do general life... how I'm not grey yet I'll never know!

There are many reasons why I love working at LMF; however, I think many of them come down to the workplace culture. The Senior Leadership Team lead by example, they make you feel like a valued part of the business and are always there to motivate and support you. I'm fortunate enough to work alongside a great team of people, both on site and in the office and genuinely enjoy coming into work every day. What more can you ask for?
