

## Lisa Foran

Director / ECO Compliance Manager

---

My role within the business varies but my official title is ECO Compliance Director. I work within the ECO section of the business and it's the responsibility of myself and my team to ensure that all paperwork is present and correct prior to any jobs starting. We are also responsible for checking all Surveys and ensuring jobs are viable before any work is carried out. The introduction of ECO 4 means we've never been busier, and we work closely with the sales, survey and install teams to ensure the smooth running of install programmes. I have almost 7 years of working within the ECO industry and it's been a privilege to be in a position where we can help vulnerable customers and assist those living in fuel poverty.

When I'm not working with the compliance team, I work closely with our office manager ensuring all is running smoothly. This can include anything from HR issues to making sure the office decor is up to scratch. No two days are ever the same for me and although it can be hectic (and loud) LMF is a thoroughly enjoyable place to work.

2023 has been an incredibly successful year for us. We've hit record numbers of installs and picked up awards at both the Regional and National Energy Efficiency awards including National Solar PV Installer and Contractor of The Year which has really cemented our position within the industry.

I have absolutely no doubt that 2024 will be even bigger and better and with a fantastic team and a thriving industry behind us I strongly believe that we will once again exceed our business goals and targets leading to further growth and immeasurable opportunities. I'm incredibly proud to be part of an industry that heavily contributes to the Net Zero Journey.
