

Akshay Govinda

Submissions Manager

My Role within the business is Submissions Manager. My job is to ensure the smooth running of submissions, helping the team out where I can, providing training, liaising with installers, customers, and other departments where necessary. My most recent work has seen myself be a part of a team transitioning over from ECO3 to ECO4.

I think we can all agree that LMF offer a family environment, orientated around nurturing talent giving us all a chance to succeed which makes the company a joy to work for. Having been here for over 5 years, I believe that I have found my place learning something new every day, facing new challenges. Watching and being a part of LMF grow from strength to strength, getting over every hurdle I am excited to see what the next 5 years bring for LMF and very much looking forward to being a part of it.
