

## Gavin Cree

### Quantity Surveyor

---

Hi I'm Gavin and I am the Quantity Surveyor for the Company. I have been in the Construction Industry for nearly 20 years now and have a BSc Hons Degree in Quantity Surveying. I Commercially Manage the Contracts from start to finish under the watchful eye of our Commercial Director. This is inclusive of Pricing, Procurement, Budgeting, Reporting, Valuations, Client liaison, attending meetings and Sub-Contract Management together with all other Commercial tasks as required. I also work very closely with the Directors and Project/Finance Team with the day to day running of the projects and I am always trying to suggest and implement processes and procedures to streamline and improve the Contracts.

I have now been at LMF for 6 months and have really enjoyed it. Everybody gets on well together and there is such a friendly atmosphere. We all work as part of TEAM and are willing to help each other as much as we can. It is such a busy active office but there is still that element of humor and friendliness.

The Directors of the Company are so friendly and are more than happy to muck in when they need to, which is very respectful. They are always asking how your weekend has been and how your family are, also if there is ever an personal issue that you need to attend to they are more than happy to let you do this.

I really like working here and can see a good future.
