

Georgina Grey

Accounts Manager

I've been with LMF for almost 3 years and I'm the Accounts Manager for the business. I'm an AAT Qualified Accountant and I came to LMF from the electrical wholesale industry.

I am responsible for all things transactional, overseeing our accounts assistant to ensure good housekeeping on both the sales and purchase ledger and accurate project costing on all purchases. I also liaise with wholesalers helping track down new products and ensuring we get the best prices.

However, my main role within the business (for my sins!) is managing the invoice and payment process for over 70 sub-contractors. I run this start to finish, working with the commercial teams to get the invoices and expenses checked for final sign off by the Directors. I also handle all things CIS; verification, deductions, and monthly returns and statements.

I also process the monthly payroll end to end and handle all PAYE and pension payments. It's a fast paced varied role that keeps me on my toes to say the least! Just as much as my 3 gorgeous babies do. How I keep it together I'll never know.

I love working for LMF because they're like a family to me, the whole team were so welcoming when I first started from the team members right the way through to the directors. They set by example and make sure every team member is looked after. Throughout the past few years the team has expanded and every single person is welcomed in with open arms. Having such an amazing team office based and site, and the best group of directors makes you really enjoy coming into work.
