

Lauren Norman

Sales Executive

My role at LMF is to be a key point of contact for all our customers, whether that be survey stage, install or general enquiries. I also work closely with Local Authorities, Lead Generators, and assist with the delivery of multiple measures across various ECO funded schemes. I like to ensure all of our customers have a stress-free experience during their journey with us and that they can be rest assured we all care about improving their homes just as much as they do!

I have worked for LMF a year in November and often question what I was doing with myself before here. The directors are and have always been the most approachable people and praise us no matter the circumstances which I love.

The LMF staff always drive each other to hit targets and support each other when needs must.
