

## Joe Kite

Sales Executive

My role within the business is to be the first point of call for our customers. I help organise our retrofit assessments for the eco schemes, ensuring that all jobs are compliant before proceeding to survey. I also assist customers through their installation journey, making sure their experience is as seamless as possible by keeping them up to date with our schedule and answering all queries they have.

I have been part of the LMF for just over a year now and I have loved every minute! Having grown up in London and moving to Liverpool when I was 21, LMF have been like a family to me since day one and I can't see myself working for anyone else!
