

CASE STUDY

ECO 4 MULTI MEASURE

This lovely but draughty property was becoming increasingly more expensive to run due to poorly insulated walls and inefficient heating.

We carried out a full Retrofit assessment and as our customer was in receipt of Guaranteed Pension Credit it entitled her to have the following measures installed:

- . Solar PV
- . Air Source Heat Pump
- . Heating and Hot Water Controls
- . Internal Wall Insulation
- . Flat roof Insulation
- . Room in Roof Installation all

Our customer was absolutely thrilled with the results of her home upgrade all completed by LMF Energy Services completely free of charge through the Government ECO 4 Grant.

This property had an energy efficiency rating of an F which has now been raised to a high B meaning our lovely customer can look forward to seeing a significant reduction in her energy bills.

Products Used (please note all products are subject to stock and may vary)

- . Grant QR range Indirect Heat Pump Cylinder
- . Grant Aeron R32 Air Source Heat Pump
- . Wetherby Internal Wall Insulation System
- . Honeywell Home Programmable Thermostat
- . Emlite Single Phase Meter
- . Solis Single Phase Inverter
- . Trina Vertex S Monocrystalline Module

LMF Energy Services

"The work that this company has done to our home is fantastic, I have been in ore with their expertise and such friendly guys , explaining every step of the way and helping to move our large furniture, they tidy up at the end of each working day it was a pleasure to have them in our home , I was particularly pleased at how the joiner matched the skirting boards to the old ones , and the skill of the chaps that did the insulation work the plastering is superb . I can't believe what a difference it has all made right from the first walls being insulated we could feel a difference, before the work was done if I had been able to afford to heat our home like it is now it would have cost us £1000 a month ! Now it costs less than a packet of cigarettes a day what a saving , our home used to be so draughty but not anymore , I'm particularly looking forward to going to bed next winter without a woolly hat on "
