

Katherine Mee

Post Compliance Officer

My job role here is a little bit of everything after install has taken place. I am here to ensure everything runs smoothly between operations and submission to ensure our amazing team have everything they need for a smooth submission.

I'd like to think I am helping the team out where I can and other departments where necessary.

I am fairly new to LMF as I only joined the company in August 2023. I have come from an ECO4 background, so I have taken to it quite well with the experience I have in the industry already.

I have come from being a Big fish in a tiny little pond to being a little fish in this massive river of ECO at LMF and it excites me a lot to learn so much more. It was the best decision I ever made.

I am surrounded with a lot of talent here at LMF and everyone I work closely with has taken me under their wing and welcomed me. It feels like I am now home where I belong.
